Silver Terrace

Illegal Dumping by San Francisco Neighborhood

More than 30% of citywide evaluations reported illegal dumping.

Illegal Dumping

Data quality /
interpretation
matters

Trash [is expensive in San Francisco](#). [Trash cans can be elusive](#) and [expensive, too](#).

The result? Dumping has become a huge problem in the city, as folks drop mounds of trash and large debris on sidewalks and known dumping hot spots—a practice that is free but also illegal, not to mention gross for anyone living in high-dumping zones.

Though the [Bayview-Hunters Point neighborhood](#) has been highlighted as a dumping hot spot, the **Portola and Bernal Heights neighborhoods have taken the crown in 2022**: Both neighborhoods reported illegal dumping activity in over 80% of their commercial area evaluations, compared with a citywide commercial areas rate of 36%.

Resident Reporting Misleads

Unreliable for planning

Requires Planning

What if we had perfect data?

Drones / AI

Creating a dumpsite AI

Narrow Dumpsite AI

Dedicated to finding
dumpsite textures in
photos.

Creating a Dumspite Dataset While Reporting

- 1. Train low accuracy model**
Using low accuracy model to get a small productivity gain
- 2. Actively learn**
continuously add new positive/negative cases to dataset
- 3. Automate top 10%**
where the model has high confidence automate reporting
- 4. Continuously add more automation**
every automated improvement pays dividends

12,000+

dumpsites

Texture bias

From the air garbage is texture

aerbits.com

Using a dumpsite AI

1 Take 1000 photos

2 Scrub private property

3 Detect dumpsites with AI

4

Measure and describe

5

Pinpoint dumpsite location

aerbits.com

Using Drones + AI reporting dumpsites

1

Daily city-wide report

Snapshot / mask

Detect dumpsites

Analyze size / content

Integrate with 311

Feedback from DPW

2 Every street / every pile

3

City operates more efficiently

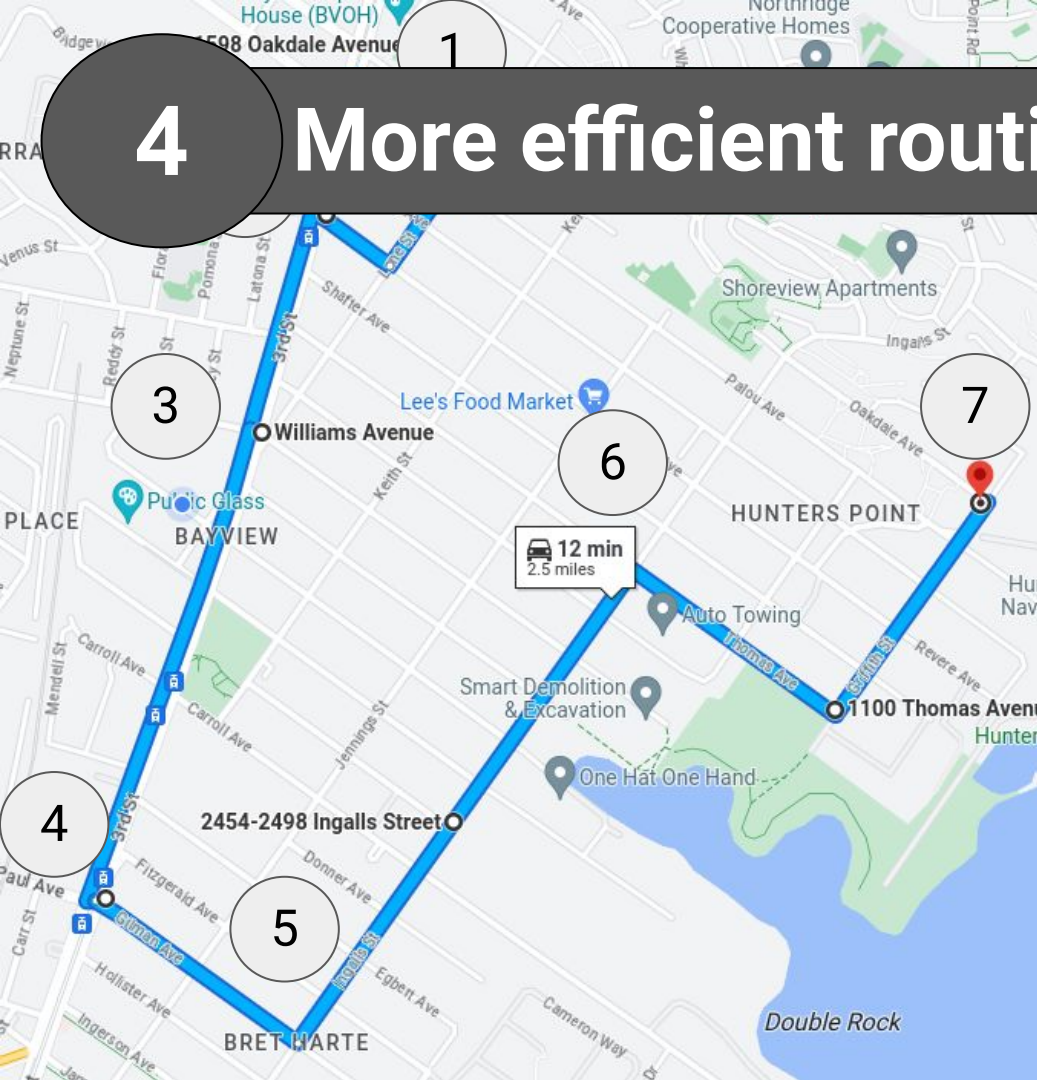

**Total knowledge of the
state of waste / streets**

4 More efficient routing

Only 2.5 Miles
